Patent Pending

- Safe & Secure Boarding
- Easy Installation
- Removable in Minutes
- Rigid 3-Point Attachment
- Power or Sail
- Fits Aft Cockpit or Aft Cabin Boats with Swim Platforms
- Polished Stainless Steel for Years of Marine Environment Service

Nova EZ-Board™ is an innovative removable handrail that mounts on the swim platform of most powerboats or sailboats. The unique design provides a sturdy handrail for the safe and comfortable boarding of crew and friends onto the boat using the swim platform. Whether someone is stepping from a dinghy, leaping from the dock or getting out of the water, the EZ-Board™ helps assist safe boarding.

The all stainless steel EZ-Board™ system is strong & secure, yet can be quickly removed when not needed. Modular in nature, the rail can be disassembled and easily stowed. Installation is simple using basic hand tools and arrives complete with some fasteners, an allen wrench and stainless steel rods. All tubes, rod, terminals and clamps are polished stainless steel.

The EZ-Board™ is available in 3 sizes to fit the depth of a swim platform. Each unit can also be cut to length for a semi custom situation.

We strongly recommend that this product be professionally installed. For a list of Forespar dealers in your area please go to www.forespar.com
