

## Tea Tree Power® Testimonials

*"I have bought two 8 oz jars of Tea Tree Power® over the past year. One jar is in the guest head in our boat (with poor ventilation) and the other is placed in a guest bath in our home (also with poor ventilation). Within two days in each case, all odors that existed in these rooms disappeared.*

*"Tea Tree does not emit an odor within itself but it seems to eliminate any odors whatsoever from the rooms. The rooms have been rendered odorless. Therefore I feel that we're not adding odors, i.e. pollution, into the air.*

*Both jars last between 6-8 months with 3 holes opened in each lid."*

John H. -- Colorado

*"I first purchased Tea Tree Power® at the 2013 Miami Boat Show. I purchased two jars and placed them both in the cabin of our boat. Within a few days all the musty odors went away as did the mold. The boat is kept on a lift and therefore the air conditioning cannot be run continually. I live in Florida where it's hot and humid year around. Since it worked so well I purchased more and use it continually. It's an excellent product and it works, I highly recommend it!"*

Lee S. – Florida

---

*"I used it on the walls of my shower in the master bedroom as well as on counter surfaces in my kitchen. It smells great and it's long lasting!"*

Robert M. – New York

*"I bought the Tea Tree Power® products for our sailboat, but ended up using them in our home! Our heating system ducts smelled moldy. I took some small little bowls that would fit behind the grates, filled them with the Tea Tree Power® Gel and placed them in the intake ducts for the heating system. Voila! The moldy smell disappeared almost immediately. When we put our boat in the water, I'll be using the Tea Tree products there, as well. It's a great product that delivered on its promise!"*

Jane D. -- Massachusetts

*"I have been battling mold and mildew in my boat for years. I have tried vinegar, bleach, and various special purpose cleaners. I have scrubbed, scraped, and rinsed. Nothing worked particularly well. Tea Tree Power® Gel is a magic solution. It works 24 x 7 year round. No need for scrubbing or scrapping. It even smells good!"*

Fred G. – Nova Scotia, Canada

---

*"I purchased the Tea Tree Power® for our boat. We are live aboards, and have been for the last 11 years, and I try to keep the boat smelling fresh. During the winter months in South Florida there are times that the boat is closed up during the day, because of rain or cold weather, and when we come home in the evenings it can smell musty from being closed up. I have noticed that with the Tea Tree Power®, it controls the musty odor, along with any head odor that we have.*

*"Also, it has helped keep the mold and mildew issues under control and I don't seem to be cleaning up the mold and mildew as often as I used to. Which I know is much better for us, since we aren't breathing in the mold spores that may be in the boat without it. It is a product that I always keep on my boat, and use on a regular basis."*

Cindy G. – Florida

---

*"I have used the Tea Tree Power® gel for one summer and one winter season on my boat. My interior boat cabin is mostly fabric (it is an older boat, 27', 1987) and the Tea Tree gel has eliminated any odor along with basically eliminating all mold. While it may seem pricey, it is worth it."*
