T-150 Water Strainers Mount Easily In Tight Locations

Our new Marelon T-150 Strainer was developed to provide flexible installation alternatives. It includes a new mounting bracket that mounts quickly and allows ports to face any direction so it can be easily positioned as needed to fit tight lower locations.

The T-150 has a #8 mesh stainless steel screen and clear polycarbonate screw on basket with replaceable gasket for a positive seal and ease of cleaning. Vacuum and vibration tested, it is also highly durable.

The new T-150 fits 1-1/2" female NPSM (Parallel Threads) ports to which you can attach a straight or 90 degree hose barb tailpipe as needed. Port adaptors are also available for 3/4", 1", 1-1/8" & 1-1/4" sizes.

See The Flow With Clear View Hose Connectors

Now you can tell at a glance if you have flow through your hoses with Forespar's new clear DuPont® polycarbonate hose connectors. Great for raw water intake strainers and intake valves, they are strong, light weight, will never corrode or be subject to electrolysis.

They will fit all Forespar® Water Strainers and valves and have marine standard NPSM threads. They work on any metal marine valves or fittings with NP parallel threads and are available as straight tailpipes or 90 degree elbows in sizes ranging from 1/2" to 2".

Not for use with fuels, anti-freeze or solvents

Sta-Plug Fills The Gap

Sta-Plug™ is Forespar's new form fitting emergency plug with exclusive edge gripping riblets to help hold it in place and seal the water out. Its soft cone shaped design easily adapts to fill the irregular shapes of hull impact breaches, as well as any round hole leak from a hose or through-hull. Its size can also be easily adjusted by tearing along any riblet.

Suggested Retail: \$19.95 at your local marine dealer or internet site.
