

LeisureFurl™ Sets New Standard In Furling Performance

Whether monohull or multihull yachts, the diverse line of carbon fiber

poles and booms from Forespar® Leisure Furl™ withstand the elements and time. A product designed to maximize your sailing pleasure, Leisure Furl™ delivers simplicity of use, and unmatched reliability proven over thousands of booms, and hundreds of thousands of nautical miles.

For more than 40 years, Leisure Furl™ has been the pioneer in the development of in-boom furling to overcome the limitations of in-mast furling and allowed sailors to continue sailing shorthanded and with less effort.

Forespar® is one of the oldest and most established boating hardware manufacturers in the United States. As spar builders, for more than 45 years Forespar has built aluminum and carbon fiber masts and booms - from 24 feet to over 100 feet. That's why Forespar understands spar function and loads better than most other boom furling suppliers. It gives Leisure Furl™ the depth of experience you can count on.
