NEW PRODUCT RELEASE

February 17, 2014

MareLube™ Reach Valve Lubrication Kit

Pre-Loaded Syringe With Extension Tube For Hard-to-Reach Valve Locations

Rancho Santa Margarita, CA -To keep marine valves and seacocks working smoothly, periodic lubrication is essential. Forespar's new MareLube Reach kit is designed to inject lubrication directly into the valve where it is needed using an extension tube to get into those often hard-to-reach valve locations.

Compatible with bronze or composite valves like Forespar's Marelon® fittings, MareLube is a lubricant specially formulated for use with all types of marine valves. One squeeze of the pre-loaded MareLube Reach syringe dispenses lubrication through the extension tube to the inside of the valve

ensuring all moving parts work and seal correctly.

The complete MareLube Reach kit includes a 30cc syringe pre-loaded with MareLube Valve Lubricant, extension tube, applicator brush and reusable syringe cap.

MareLube Reach Kit

Part #: 770049

MSRP: \$12.95
