NOVA[®] EZ Board Swim Platform Handrail Removable Rail Offers a Sturdy Grip to Anyone Boarding

Rancho Santa Margarita, CA - Forespar announces a new and innovative removable handrail that fits on the swim platform of most power or sailboats. The unique design offers persons coming up out of the water, stepping from a dinghy or leaping from a dock a handrail at the back of the swim platform to steady themselves with.

The system is strong & secure making boarding and disembarking a safe transfer. The installation is simple, stable and strong using hand tools.

Modular in nature, the rail can be disassembled and stowed in a very compact space. The system comes complete with some fasteners, allen wrench and stainless steel rods. All tubes, rod, terminals and clamps are polished stainless steel.

The EZ Board comes in 2 sizes to fit the depth of a swim platform. Of course each unit can be cut to length for a semi custom situation.

158100 Swim Platform to 30" wide – sug retail \$270.00

158200 Swim Platform to 42" wide – sug retail \$ 290.00
