

FORESPAR®

TruPlug

Insert, Push & Twist

The Modern Alternative to Wooden Emergency Plugs

Forepar's TruPlug is a soft, cone shaped plug designed to conform to the irregular and unpredictable shapes of a hull breach. Whether it's a round hole caused by mechanical failure, or an elongated tear due to impact, TruPlug adapts to slow or stop the leak. Unlike old fashion wooden plugs, TruPlug's unique shape allows it to be compressed by hand or cut to fit. It also gets into hard-to-reach locations and can also be pushed into a gap using a screw driver or similar tool. TruPlug is the true stop-gap solution for emergency leaks.

The True Solution for Emergency Leaks
