July 9, 2009

I am a captain for Vessel Assist Ventura and my profession is helping people at sea who are in some kind of distress. Usually help is needed because of a mechanical failure. Yesterday a mariner was a couple miles off the coast when a 5 inch exhaust hose ruptured and began flooding his boat. The TruPlug saved his boat and kept it from sinking.

The boat was plugged from both the inside and the outside and the TruPlug worked perfect. The boat was dewatered and then towed to a dry dock for repairs.

The unique shape of the TruPlug is perfect for any size or shape hole. A real must for all boats.

Regards,

  
Capt Randy Davis  
USCG Master
