October Issue 2013

T-150 Water Strainers Mount Easily In Tight Locations

Our new Marelon® T-150 Strainer was developed to provide flexible installation alternatives. It includes a new mounting bracket that mounts quickly and allows ports to face any direction so it can be easily positioned as needed to fit tight lower locations.

The T-150 has a #8 mesh stainless steel screen and clear polycarbonate screw on the basket with replaceable gasket for a positive seal and ease of cleaning. Vacuum and vibration tested, it is also highly durable.

The new T-150 fits 1-1/2" female NPSM (Parallel Threads) ports to which you can attach a straight or 90 degree hose barb tailpipe as needed. Port adaptors are also available for 3/4", 1", 1-1/8" & 1-1/4" sizes.

See The Flow With Clear View Hose Barbs

Now you can tell at a glance if you have flow through your hoses with Forespar's new clear DuPont® polycarbonate hose connectors. Great for raw water intake strainers and intake valves, they are strong, light weight, will never corrode or be subject to electrolysis.

They will fit all Forespar® Water Strainers and valves and have marine standard NPSM threads. They work on any metal marine valves or fittings with NP parallel threads and are available as straight tailpipes or 90 degree elbows in sizes ranging from 1/2" to 2"

Not for use with fuels, anti-freeze or solvents

Sta-Plug Fills The Gap

Sta-Plug™ is Forespar's new form fitting emergency plug with exclusive edge gripping riblets to help hold it in place and seal the water out. Its soft cone shaped design easily adapts to fill the irregular shapes of hull impact breaches, as well as any round hole leak from a hose or through-hull. Its size can also be easily adjusted by tearing along any riblet.

Suggested Retail: \$19.95 at your local marine dealer or internet site.

Closed For Inventory

Forespar Products Corp. will be closed for our annual inventory from Oct. 24th through November 7th. There will be no shipping or manufacturing during this period.

Please be sure to schedule any orders with adequate lead times to ship either before or after these dates. Orders already received with ship dates falling on these closure dates will be shipped before October 24th. If you need to reschedule any orders, please let us know as soon as possible.

Thank you for your understanding and support of the Forespar team during this inventory period.

Tea Tree Power™ Expanding Distribution

Tea Tree Power has proven to be a good seller and several new distributors have picked up the product line to join in the success. Bell Industries in the Midwest, Land N Sea, Kellogg Marine, Paxton Marine & Western Marine have all joined the list of Tea Tree Power distributors.

IBEX Was A Clear Success For Marelon®

IBEX was another great show for Forespar Marelon. Our new "Clear View" tailpipes and elbows were a big hit. Forespar Marelon is the 21st Century answer to bronze-age metals and its acceptance and use continues to grow with the world's top boat builders.

Forespar's ROV (Remote Operated Valves) and our new "Interlock System" (allows the equipment to control the valve or the valve to control the equipment) are now standard at many OEM's and are currently in testing at others. The interest in these systems continues to grow as does their use. MareLube, MareLube Extra

and TEF-45 continue to pick up new customers and more use by existing customers.
