Technique

Sailing with a whisker pole

Hoisting out the gennak should be an every sailor's bag of tricks.

Downwind, the lack of leeward generally means the gennak will be hoisted on the leeward side. Some sailors choose to hoist the gennak on the leeward side, but this is a less than ideal option. A whisker pole is a great way to hoist the gennak on the windward side of the boat, which is the preferred method.

When using the traditional method of hoisting the gennak, the sail is hoisted on the leeward side of the boat. This is not ideal because the sail will be hoisted on the side of the boat that is downwind. A whisker pole allows the sail to be hoisted on the windward side of the boat, which is the preferred method.

The whisker pole is a simple device that consists of a pole that is attached to the mast and the boom. The pole is used to hoist the gennak on the windward side of the boat. This is a great way to hoist the gennak on the windward side of the boat, which is the preferred method.

When the gennak is hoisted on the windward side of the boat, the sail will be hoisted on the side of the boat that is upwind. This is the preferred method because the sail will be hoisted on the side of the boat that is upwind, which is the preferred method.

A whisker pole is a simple device that consists of a pole that is attached to the mast and the boom. The pole is used to hoist the gennak on the windward side of the boat. This is a great way to hoist the gennak on the windward side of the boat, which is the preferred method.

Sailing Magazine Shows Benefits of Whisker Poles

In the September issue of Sailing Magazine, Technical Editor Bob Pingle featured the benefits of sailing downwind using a whisker pole. This article takes the reader through a step-by-step explanation of how to deploy a whisker pole, as well as explaining all the necessary hardware.

If you have customers that can use a little help with their downwind sailing, this article is a credible explanation of why all sailors should have a Forespar Whisker Pole onboard.
