PRESS RELEASE

For Immediate Release

EZ Grip Spinnaker Pole Affordable Rough Textured Carbon Pole

Rancho Santa Margarita, CA - An affordable "EZ Grip" spinnaker pole has been introduced as the new standard offering of the Forespar family of carbon fiber poles. It provides all the weight-saving benefits of the traditional premium finished poles, yet features a textured feel for excellent grip and easier handling at a lower price.

With the addition of the EZ Grip pole, Forespar now offers three types of carbon fiber pole finishes. A high gloss UV resistant clear coated pole is an upgrade from the standard pole, as well as the custom colored Awlgrip pole which can be painted to match any color scheme on the boat. Blank tubes are also available with any of the three finish options listed above.

This new "family" of poles offers the sailor a choice of a basic price-conscious pole as well as upgraded clear coated or painted poles. A padded cover is also available for protection and can be purchased from Forespar dealers throughout the world.

Forespar® is one of the oldest boat hardware manufacturers in the United States. They manufacture and distribute an extensive and diverse line of marine products including carbon fiber poles, Leisure Furl™ boom furling systems, Marelon® plumbing fittings and Lanocote® corrosion protection coating.
