

For Immediate Release

Self-Sealing Safe-T-Drain Plug™ Prevents Accidental Flooding

New Garboard Drain Uses Removable Flotation Ball Cartridge To Instantly Seal Itself

[Hi-res Image Link](#)

Rancho Santa Margarita, CA – Forespar's new Safe-T-Drain Plug automatically seals itself to prevent accidental flooding even if the plug cap is not in place. It uses an exclusive removable flotation ball cartridge that instantly floats up to seal the drain when the transom hits the water.

Safe-T-Drain Plug is a "plug & play" replacement for generic OEM drain plugs, so it can be quickly installed in minutes. The flotation ball cartridge can also be easily removed for cleaning of the stainless catch screen by unthreading the drain assembly using the head of the plug cap. No tools needed. Safe-T-Drain Plug comes in an oval or round style, and 3 different materials.

Forespar® is one of the oldest, most established boat hardware manufacturers in the United States. Their diverse line of marine products includes carbon fiber poles, Leisure Furl™ boom furling systems, Marelon® plumbing fittings and numerous other marine related products.
