## Forespar Tri-Reacher™ Asymmetrical Sail Pole New Adjustable Length Pole Offers Affordable Downwind Control Option

**Rancho Santa Margarita, CA** – Forespar's new Tri-Reacher Pole offers an affordable option for asymmetrical sail users looking to upgrade their downwind sail control. This new 3-piece adjustable pole can be adjusted for almost any asymmetrical sail and works well for boats 30ft to 42ft. When combined with the new Fixed Mast Bracket, it creates a basic pole system that is less expensive and easily owner installed.

Unlike other more expensive adjustable length whisker poles, the versatile Tri-Reacher pole uses a simple stop-pin adjustment system that keeps the cost down, while still offering a large

range of pole length choices. The user simply selects the pole length by inserting the stop pins through the poles numerous pre-set adjustment holes. Once in place, the Tri-Reacher creates a stable pole system for enhanced downwind performance and safety. Extendable from 8 to 21 feet, the Tri-Reacher utilizes either Forespar's proven UTS Toggle "socket" style end system for quick connection at the mast, or a UXP end fitting for traditional ring connections. Tri-Reacher is made using a combination of 3, 2-7/8 and 2-1/2 inch diameter military grade aluminum tubing.

In conjunction with the new Tri-Reacher pole, Forespar has also introduced a new simple Fixed Toggle Mast Bracket connection point. Easily installed with 10 screws, this new bracket creates a fixed height attachment point without the cost and hassle of installing a full adjustable mast car track car system. Available for use with either Forespar's TS Toggle pole ends, or traditional flange mounted pole end, this bracket is the easiest and most affordable way to get a secure pole connection point on almost any mast.

Forespar® is one of the strongest, most established boat hardware manufacturers in the United States. Their diverse line of marine products includes carbon fiber poles, Leisure Furl™ boom furling systems, Marelon® plumbing fittings and numerous other marine related products.
