

Better Than Bronze!
MARELON[®]
 World's Most Trusted Composite Marine Plumbing System

Four New Products

Even More Reasons to Make Sure Marelon is Onboard

Titan T-Strainer

Up To 25% Better Engine Cooling

Our new Titan Strainer is based on our popular space-saving T-150 Strainer, but incorporates a new, larger strainer screen design that significantly increases water flow. It also has a new top port for easy flushout and winterization. Just like our T-150 strainer, the tough polymer bowl is also specifically formulated to prevent cracking and glazing from antifreeze.

- **33% Larger Stainless Screen Means Less Frequent Cleaning**
- **Integrated Top Mount Flush-Out Plug**
- **Compact, Lightweight & Easy to Install**

Wide Mouth Drain

Forespar's new push-fit scupper drain is a versatile option for draining decks and transoms. At 3" wide by 1-1/4" high, it allows for a significant flow of water, while its snap-together construction can be used with hulls ranging in thickness from 2-1/4" to 3-3/4". It also works well at preventing wire and hose chafing where they pass-through a wall or bulkhead.

Part No.	Model No	Size
907035	Wide Mouth Telescoping Drain Transom	1-1/4" H X 3" W

Pro Series™ Extra Long Thru-Hull

Now available with our Pro Series valves, our new Extra Long Thru-hulls are designed to accommodate many of today's thicker hull designs. With an overall thread length of 5-3/4" and specifically sized to fit the overall valve size, these thru-hulls greatly expand a builder's seacock placement options. These are a special order item that can be specified by adding an X modifier to the part number when ordering.

Scan our Pro Series Valve Selection Guide for ordering details

Speed Scoop

Forespar's new Speed Scoop is designed for higher velocity and volume applications. Intended for use in powerboats and speedboats of all types, the Speed Scoop maximizes water intake flow while minimizing drag and turbulence. Standard kit includes 1-1/4" NPSM thru-hull. The Large Speed Scoop is an option available with Pro Series valves that are 1-1/2" or larger.
