

## TILLER EXTENSION BIG STICK

### Installation

Your new "Big Stick" tiller extension is shipped in a "kit" form.

The inboard (universal swivel Speed-lock end) is glued in place for your convenience.

The outboard end cap (red cap) is loose in the package and can be used (use super glue) or not. . . Your preference.

The carbon shaft can be cut (by you) to your required custom length.

### To Replace Universal Joint
