## MINI GALLEY 2000

### THE LEGEND RETURNS! THE MINI GALLEY

Back by popular demand! The Mini Galley 2000 is a compact, versatile, fully gimbaled marine stove. The all stainless steel gimbaled frame comes with a low profile mounting bracket, which allows the entire stove to be easily detached and stowed when not in use. The Mini Galley 2000 allows cooking under adverse weather conditions or whenever a hot pot of soup or coffee is wanted without firing up the ships main galley stove. The burner can be turned on and off instantly with no pre-heating or priming necessary. A disposable propane cartridge gives up to 8 hours of hot, clean heat. Designed to accept U.S. Department of Transportation approved self-sealing propane bottles available throughout North America. This handy compact stove is ideal for small cruisers, cuddy-cabin powerboats, or on any yacht for a simple, quick hot meal or drink.
