

World's #1 Trusted Composite Marine Plumbing System

MARELON®

Better Than Bronze!

Titan T-Strainer

Updated Design Provides Up To 25% Better Engine Cooling

We never stop innovating - that's why we are introducing our new Titan Strainer. Based on our popular T-150 Strainer, the Titan Strainer uses the same space-saving T design, but incorporates several new features that significantly increase cooling water flow, while also reducing the number of necessary clean-outs.

Exclusive Features for Ultimate Motor Protection

- **Larger High-Flow Stainless Screen**

Larger 51 square inch filter screen has 33% more open surface space to allow up to 40% more water volume flow than the original T-150 Strainer. This increases engine cooling and the amount of contaminants that can be trapped to reduce cleaning intervals.

- **Straight Flow Strainer for Unrestricted Intake**

Unique screen cut-out eliminates intake resistance to increase overall flow and reduce pump strain.

- **Integrated Top Mount Flushing Plug**

New top mounted flush-out plug allows for easy winterization and flushing using a standard garden hose with 3/4" adapter. It also eliminates the need for a separate flush-out valve in the system.

- **Compact & Lightweight**

The Titan Strainer's T-shaped vertical design means it can be installed and connected in tight spaces. Female NPSM port threading also helps minimize the space needed for connections. It's also significantly lighter weight than others because it's Marelon!

- **Impact & Antifreeze Resistant Clear Polymer Bowl to View Contaminants Without Disassembly**

Titan T-Strainer Specs

Dimensions:

Height (including top plug): 9"
 Width (inlet to outlet, not including outputs): .. 5"
 Thickness: 3.75"
 Thickness with mounting chock: 4.5"

Filter Specs:

New filter surface area: 333.5 cm² – 51.7 square inches
 Filter: Stainless Steel
 Filter perforations: 3/32" holes, 33% open area
 Open surface area: 17 square inches
 New full weight with adapters and chock: ... 1023g, 2.25 pounds
 Full weight without adapters or chocks: 632g, 1.4 pounds
 In/Output threads 1-1/2" Female NPSM
 Filter Stainless Steel
 Max Intake PSI (Spike) 150psi @ 70°F
 Max Vacuum up to 25 inHg
 Adaptors 3/4", 1", 1-1/8", 1-1/4", 1-1/2"
 (Sold Separately)

Titan Strainer, Adaptors & Replacement Part Numbers

Part #	Description
906165	NEW Titan T-Strainer With Mounting Bracket
920261	Titan T-Strainer Clear Bowl
920262	Titan T-Strainer Gasket
920264FN	Titan T-Strainer Mesh Screen
906187	Titan T-Strainer Mounting bracket
910158	Titan T-Strainer 3/4" Barb Adapter
910159	Titan T-Strainer Garden Hose Adapter
901044	1- 1/2" Male Thread to 1- 1/2" Barb Adapter
901052	1- 1/2" Male Thread to 1-1/4" Barb Adapter
901001	3/4" Male Thread to 3/4" Barb Adapter
910063	1- 1/2" Male Thread to 3/4" Female Thread Adapter

Easy to Install
Snap-In Bracket
Included

Basket Strainer Also Available:
Perfect for low pressure
water cooling systems
